SkyTide

CASE STUDY

FROM 3 PLANTS TO 10. IT BUILT TO KEEP UP.

Growing Operations. Aging Technology.
Time for a Better IT Strategy.

OVERVIEW

A global manufacturer was expanding rapidly. But aging infrastructure, disconnected systems and limited internal IT resources made growth harder than it needed to be.

SkyTide stepped in to unify technology, strengthen IT support and build an infrastructure ready for continued expansion.

Growth
3 to 10 plants

Services
Full Managed IT Services

THE BIG RESULT

3 → 10

Plants supported through expansion with a unified IT strategy.

SkyTide

THE CHALLENGES

Growth Was Moving. IT Was Falling Behind.

More Plants. More Systems. More Pressure on IT.

As the manufacturer expanded from 3 to 10 plants, its technology struggled to keep pace. Ageing infrastructure, disconnected systems and limited internal IT resources created growing operational risks.

What worked for three plants wasn't built to support ten.

Aging Infrastructure

Outdated equipment and inconsistent systems made it harder to support expanding operations.

Disconnected Technology

Different systems and vendors across locations created complexity and made standardization difficult.

Stretched IT Resources

A small internal IT team was responsible for supporting a growing operation with increasing demands.

Growth Without a Roadmap

Expanding facilities and technology needs required more consistent planning, budgeting and long-term IT direction.

The Bottom Line

Growth was creating opportunity. IT complexity was creating risk.

The manufacturer needed more than technical support. It needed an IT partner capable of bringing consistency, accountability and a plan for what came next.

SkyTide

THE SOLUTION

Standardized Infrastructure

Brought greater consistency to networks, equipmentand systems across facilities.

Centralized IT Support

Established consistent support, ticket tracking, documentation to improve visibility and accountability.

Cloud Modernization

Helped move critical technology toward cloud-based solutions to support a growing, distributed workforce.

Strategic IT Planning

Helped move critical technology toward cloud-based solutions to support a growing, distributed workforce.

The SkyTide Difference

Not Just Supporting Growth. Planning for It.

With one accountable IT partner, the manufacturer gained a more consistent approach to technology across its expanding operation.
